Table grill

Pure Essentials Collection

Smooth and ribbed plate

2300 W

Timer

HD4466/90

Discover fuller flavours

Grill it your way with digital temperature control

This stainless steel Philips table grill HD4466/90 has plenty of power to seal in the flavour, and a digital temperature control. It's fast heating and has a ribbed-and-smooth extra thick plate that keeps its heat, even with frozen food.

Discover variety of fuller flavours

- Digital temperature control for perfect grilling results
- High power for heating up fast and keeping a constant heat
- Extra thick grill plate stays hot, even with frozen food
- High temperature grill plate seals in all the flavour
- Recipe booklet

Smart features

- Splatter guard keeps cooking surface clean
- Ribbed-and-smooth top allows stir-frying, grilling and more
- Grease drainage

Only a little effort

- Digital timer with ready signal and auto shut-off
- Non-stick grilling surface
- Dishwasher-safe parts
- Easy to store upright

Highlights

Digital temperature control

The secret to good grilling is to cook at the right temperature. This grill comes with digital temperature control for perfectly-cooked meals that are bursting with juicy flavour. Simply program the required temperature and the digital temperature control takes care of the rest, maintaining a constant cooking temperature with perfect precision.

Digital timer

Great cooking is all about the timing, which is something you'll never have to worry about with this precise digital timer. Simply select a cooking time and the timer will let you know when your food is ready. The grill shuts off automatically after 30 minutes of standing idle, preventing a safety risk from accidentally leaving the grill on.

Dishwasher-safe parts

Dishwasher-safe parts make cleaning easy.

Extra thick grill plate

The extra thick grill plate retains more heat than a standard grill, so it stays hot, even when you place frozen food onto it. This constant temperature cooks food faster and more evenly. It also keeps the plate hot in those first crucial moments when you place food onto the grill, sealing in all the flavour and juices.

Grease drainage

Excess grease is drained to removable tray.

High power

The high power of the appliance enables the grill plate to heat up quickly, reaching operating temperature very fast and saving you precious time. It also means that the grill surface keeps its heat when food is placed onto it because the high power ensures a fast recovery to the correct temperature.

High temperature grill plate

The high temperature of the Philips electric grill seals in all the juices and flavour of the food. That's because the moment the food

comes into contact with the surface of the grill, it begins to sizzle and brown, forming a tasty crust that keeps all the goodness and flavour inside, where it belongs.

Non-stick grilling surface

Non-stick surface prevents food particles from sticking.

Recipe booklet

Recipe booklet packed with expert tips and tasty treats.

Ribbed-and-smooth grill plate

The versatile grill plate gives you the choice of cooking with either a ribbed or smooth grilling surface, so you can enjoy your food the way you like. The smooth area is suitable for stir-frying and grilling small pieces of food. The ribbed surface creates that irresistible flame-grilled effect.

Spatula

Spatula for flipping, stirring and removing food.

Specifications

General specifications
