This appliance can weigh up to a maximum of 11 pounds / 5 kilograms. Overloading the weighing platform with weight heavier than the maximum amount can permanently damage the appliance. Please note that 'Err' will become visible on the display if the weighing platform has been overloaded by putting a weight of more than 11 pounds or 5 kilograms on the platform (fig. 18). Immediately remove overweight items to avoid causing permanent damage to the scale.

 - Press Reset Button **▶O◀**. The display will read '0' again (fig. 13).

- To clear the memory, be sure to switch the scale off using the On/Off Button.
