- 2 Turn the cutting element and lubricate the three points indicated with oil from the oil bottle supplied.

Using the appliance

This appliance can be used cordless or directly from the wall socket.

Preparing for use

Make sure your hair is clean and dry.

- 1 Comb your hair with a styling comb in the direction of hair growth.

Hairclipping tips

- We advise you to start clipping at the highest setting of the regular comb attachment and to reduce the setting gradually.
- To clip most effectively, move the appliance against the hair growth direction.

- Since all hair does not grow in the same direction, you need to move the appliance in different directions (upwards, downwards and across).
- Make sure that the flat part of the comb attachment is always fully in contact with the scalp to obtain an even result.
- Write down the settings you use to create a certain hairstyle as a reminder for future clipping sessions.

Using the swivel head

From its starting position of 0° (pointing forwards), you can turn the swivel head 45° or 90° to the left or right. This enables you to adjust the position of the cutting element to the part of your head that you are clipping. This makes it much easier to clip your own hair.

- 1 To set the cutting element to the desired position, turn the swivel head ('click').

Note: Always adjust the position of the cutting element by turning the swivel head. Do not turn the cutting element or the comb attachment.

Note: Do not turn the swivel head more than 90° to the left or right.

The swivel head allows you to hold and use the appliance like a styling comb.

Hair clipping with comb

- 1 Insert the edge of the comb attachment into the swivel head.

Make sure the comb attachment locks into position properly.

Note: The length settings are indicated on the comb attachment.

- 2 Turn the length setting adjustment ring to set the comb attachment to the desired setting.

The arrowhead on the appliance indicates which setting you have selected.

Tip: Use different settings to create a natural and smooth transition between the various hair lengths from your neckline to the top of your head.

Do not turn the length setting adjustment ring beyond the highest setting.

- 3 Turn the swivel head to the position that is most comfortable for your arm when you clip the different parts of your head (see 'Using the swivel head').
- 4 Press the on/off button to switch on the appliance.
QC5570: Press the button briefly.
QC5580: Press the button for 2 seconds.
- 5 Move the clipper through the hair slowly.

- 6** Regularly remove cut hair from the comb attachment.

If a lot of hair has accumulated in the comb attachment, remove the comb attachment from the appliance and blow and/or shake the hair out of it. When you remove the comb attachment, the selected setting does not change.

Contouring without comb

You can use the appliance without comb attachment to clip your hair very close to the skin (0,5mm) or to contour the neckline and the area around the ears.

Be careful when you clip without comb attachment because the cutting element removes every hair it touches.

- 1** Pull the comb attachment off the swivel head.

Never pull at the flexible top of the comb attachment. Always pull at the bottom part.

- 2** Comb the hair ends over the ears before you start to contour the hairline.
- 3** Press the on/off button to switch on the appliance.
- 4** When you shape the contours around the ears, tilt the appliance in such a way that only one edge of the cutting element touches the hair ends.

- 5 To contour the neckline and the sideburns, turn the appliance and make downward strokes.

Note: Move the appliance slowly and smoothly. Just follow the natural hairline.

- 6 Adjust the position of the swivel head to make contouring easier (see 'Using the swivel head').

Cleaning and maintenance

Regular cleaning guarantees better grooming results.

Never clean, remove or replace a shaving or cutting unit while the appliance is switched on.

Always check if the water is too hot, to prevent burning your hands.

Never dry cutting units or shaving foils with a towel or tissue, as this may cause damage.

Never use compressed air, scouring pads, abrasive cleaning agents or aggressive liquids such as petrol or acetone to clean the appliance.

Clean the appliance every time you have used it by rinsing it under the tap or with the cleaning brush supplied.

Always unplug the appliance before you clean it under the tap.

Be careful that the cutting element does not fall on the floor.

- 1 Switch off the appliance and disconnect it from the mains.
- 2 Remove the comb attachment.
- 3 Rinse the comb attachment under the tap or clean it with the cleaning brush supplied.

- 4** Place your thumb in the center of the round side of the cutting element and your index finger on the teeth of the cutting element. Use your index finger to lift the cutting element from the swivel head.

- 5** Rinse the cutting element under the tap or clean it with the cleaning brush supplied.

- 6** Rinse the inside of the appliance under the tap or clean it with the cleaning brush supplied.

- 7** Insert the lug of the cutting element into the slot and push the cutting element back onto the swivel head.

Lubricate the cutting element

Lubricate the cutting element every 3 months with oil from the bottle supplied with the appliance.

- 1** Pull the front of the cutting element upwards and remove the cutting element from the appliance.

- 2 Turn the cutting element and lubricate the three points indicated.

Storage

- 1 Switch off the appliance and disconnect it from the mains.

Troubleshooting

This chapter summarizes the most common problems you could encounter with the appliance. If you are unable to solve the problem with the

information below, visit www.philips.com/support for a list of frequently asked questions or contact the Consumer Care Center in your country.

Problem	Possible cause	Solution
The appliance produces an uneven cutting result.	The comb does not touch the skin when you move the appliance through the hair.	Make sure the comb is always fully in contact with the skin when you move the appliance through the hair.
	You only move the appliance in one direction.	Because not all hairs grow in the same direction, move the appliance in different directions (upwards, downwards and across).
	The setting of the comb has changed during trimming.	Check the setting of the comb. If you push the appliance too hard onto the scalp, you may accidentally change the setting of the comb.
	The comb is not assembled correctly.	Detach the comb and reattach it.
	The cutting performance decreases when the cutting unit and the comb are dirty.	Clean the cutting unit and the comb.
The appliance does not work when I switch it on.	The appliance is not connected to the the wall socket.	Insert the small plug into the appliance and put the supply unit in the wall socket.
I do not know how to attach the comb attachments to the appliance.		To attach the comb attachments, simply slide them into the slot in the appliance.

Problem	Possible cause	Solution
I do not know how to change the hair length settings of the comb attachments.		You can change the hair length settings of the comb attachments with the length setting adjustment ring on the appliance. Turn the ring to set the comb attachment to the desired setting. See chapter 'Using the appliance', section 'Hair clipping with comb'
One of the comb attachments is damaged or worn.		Do not use the comb attachment anymore. Replace it with an attachment or comb of the original type. You can obtain a replacement comb attachment from your local Philips dealer or you can visit www.philips.com/shop . For more information you can contact the Consumer Care

- 2 转动修剪部件，用随附油瓶中的油润滑所示的三个位置。

使用本产品

本产品可以不接电源或直接连在插座上使用。

使用准备

确保头发清洁干燥。

- 1 使用定型梳沿头发生长的方向梳理头发。

头发修剪提示

- 建议您从常规梳齿附件的最高设置开始修剪，然后逐渐缩短设置。
- 要获得最大修剪效率，请沿头发生长的反方向移动本产品。
- 因为头发不会全部以相同的方向生长，您需要以不同的方向移动产品（向上、向下或交叉）。
- 确保梳齿附件的扁平部分完全接触到头皮，以获得均匀的修剪效果。
- 记下您使用的设置，用作以后剪发过程中打造某种发型的参考。

使用旋转头

您可以将旋转头从开始位置 0° （指向前方）向左或向右旋转 45° 或 90° 。您可以通过这种方法调整修剪部件，以贴合待

26 简体中文

修剪头发部位的头部轮廓。这使您可以更轻松地为自己理发。

- 1 要将修剪部件设置到所需位置，请转动旋转头（可听到“咔哒”一声）。

注意：始终通过转动旋转头调整修剪部件的位置。请勿转动修剪部件或梳齿附件。

注意：请勿向左或向右转动旋转头超过 90° 。

您可以像握持定型梳一样握住旋转头来使用本产品。

使用修剪梳修剪头发

- 1 将梳齿附件的边缘插入旋转头。
确保梳齿附件正确锁定到位。

注意：梳齿附件上指示长度设置。

- 2 旋转长度设置调整环，将梳齿附件设为所需设置。

产品上的箭头表示您选择的设置。

提示：使用不同设置在从颈部到头顶的各种头发长度之间实现自然顺利的过渡。

切勿将长度设置调整环转到最高设置之外。

- 3 在修剪不同位置的头发 (请参见 '使用旋转头') 时，可以将旋转头转动到您的手臂感觉最舒服的位置。
- 4 按开/关按钮启动产品。
QC5570：短暂地按下按钮。
QC5580：按住按钮 2 秒钟。
- 5 将理发器在头发上缓慢移动。
- 6 定期清除梳齿附件中剪下的头发。

如果梳齿附件中积聚了许多头发，请先取下梳齿附件，吹去和/或抖掉梳齿附件上的头发。取出梳齿附件时，所选的设置不会改变。

不用梳齿的情况下修剪轮廓

即使没有梳齿附件，您也可以使用理发器以非常贴近头皮的距离（0.5 毫米）或紧

密贴合颈部周围和双耳附近的皮肤修剪头发。

由于修剪部件会去除接触到的每一根头发，因此在没有梳齿附件修剪头发时要小心。

1 将梳齿附件从旋转头拉出。
切勿拔扯梳齿附件容易变形的顶部。请务必拉拔底部。

2 在开始紧贴双耳附近的发线修剪头发之前，请梳理耳朵上方的发梢。

3 按开/关按钮启动产品。

4 修整耳朵周围的轮廓时，倾斜产品，使修剪部件只有一边接触发梢。

5 要紧贴颈部周围和鬓角轮廓，请转动产品并向下修剪。

注意：缓慢、流畅地移动产品。只需顺着自然生长的发际线。

6 调整旋转头的位置，使修剪轮廓更容易（请参见‘使用旋转头’）。
