Important Information

For your safety

In the event of a power failure, you cannot use this handset to make or receive calls. Alternative arrangements should be made for access to emergency calls.

Your PIN code is preset to 0000. If you change your PIN code, keep the PIN details in a safe place where you have easy access to them. Do not lose the PIN code.

To avoid damage or malfunction:
- Do not allow the product to come into contact with liquid.
- Do not open it as you could be exposed to high voltages.
- Never use any battery type other than the one supplied.
- Do not expose the phone to excessive heat caused by heating equipment or direct sunlight.
- Do not drop your phone or allow objects to fall on your phone.
- Do not use any cleaning agents containing alcohol, ammonia, benzene, or abrasives as these may harm the set.
- Active mobile phones in the vicinity may cause interference.
- Do not use the product in places where there are explosive hazards.
- Do not let small metal objects come into contact with the product. This can deteriorate audio quality and damage the product.

About operating and storage temperatures:
- Operate in a place where temperature is always between 0 and 35°C (32 to 95°F).
- Store in a place where temperature is always between -20 and 45°C (-4 to 113°F).
- Battery life may be shortened in low temperature conditions.

Installation requirements

This product requires an electrical supply of 220-240 volts, alternating monophased power, excluding IT installations defined in standard EN 60-950. In case of power failure, the communication can be lost.

The electrical network is classified as hazardous according to criteria in the standard EN 60-950. The only way to power down this product is to unplug the power supply unit from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.

The voltage on the network is classified as TNV-3 (Telecommunication Network Voltages), as defined in the standard EN 60-950.

What’s in the box?

The following accessories are included with your SE635:

- Handset
- Base station
- Power supply for base station
- Line cord
- Battery door
- User Guide
- Quick Start Guide
- Warranty card

The line adaptor may not be attached to the line cord. In this case, you have to connect the line adaptor to the line cord first before plugging the line cord to the line socket.

In multihandset packs, you will find one or more additional handsets, chargers with power supply units and additional rechargeable batteries.

LED Message counter
- No display: Indicates that the answering machine is switched off.
- Blinking: Indicates number of new messages.
- Steady: Indicates number of old messages.
- 2 bars flashing: Indicates that there is no more memory left.
- Indicates the volume level (L0 - L9) when " volume " is pressed.
- Indicates the current message number during playback.
### Menu navigation

The basic steps of navigating through the menus and options are as follows:

<table>
<thead>
<tr>
<th>Task</th>
<th>Action</th>
<th>Illustration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter main menu/menu options.</td>
<td>Choose <strong>MENU</strong> by pressing the key directly below it (left soft key &quot;m&quot;).</td>
<td><img src="image" alt="Illustration of menu navigation" /></td>
</tr>
<tr>
<td>• Go to a specific menu option</td>
<td>1. Press ↑ key to scroll to your desired menu/option. 2. Choose <strong>SELECT</strong> by pressing the key directly below it (left soft key &quot;m&quot;).</td>
<td><img src="image" alt="Illustration of selecting menu option" /></td>
</tr>
<tr>
<td>• Confirm your selection</td>
<td>In this example, the alarm is <strong>On Once</strong>. 1. Press ↑ key to scroll to your desired option. 2. Choose <strong>SELECT</strong> by pressing the key directly below it (left soft key &quot;m&quot;).</td>
<td><img src="image" alt="Illustration of changing alarm setting" /></td>
</tr>
<tr>
<td>• To change your selection</td>
<td>• To confirm your selection • Return to previous menu level or stand-by screen</td>
<td><img src="image" alt="Illustration of returning to previous menu" /></td>
</tr>
</tbody>
</table>
The location of your base station can have an effect on the range and performance of your SE635 (see TIP below).

**Connecting the Base Station**

1. Place the base station in a central location near the telephone line socket and electricity sockets.
2. Connect the line cord and the power cable to the proper connector at the back of the base station.
3. Connect the other end of the line cord to the telephone line socket and the other end of the power cable to the electricity socket.

**TIP** Avoid placing the base station too close to large metal objects such as filing cabinets, radiators or electrical appliances. This can impair the range and sound quality. Buildings with thick internal and external walls may impair transmission of signals to and from the base.

**WARNING** The base station does not have an ON/OFF switch. Power is applied when the power adaptor is plugged into the unit and connected to the electricity socket. The only way to power down the unit is to unplug the power adaptor from the electricity socket. Therefore, ensure that the electricity socket is easily accessible.

The power adaptor and telephone line cord have to be connected correctly, as incorrect connection could damage the unit.

Always use the telephone line cord supplied with the unit. Otherwise, you may not get a dial tone.
Install battery

Your SE635 is supplied with 2 rechargeable batteries allowing approximately up to 12 hours of talk-time and up to 150 hours stand-by time. Before using the handset, the batteries have to be installed and fully charged.

1. Slide out the battery cover.

![Battery cover](image)

2. Place the batteries as indicated and replace the cover.

![Batteries](image)

Charge battery

1. Place the handset on the charging cradle of the base station. A beep is emitted if the handset is placed correctly.

2. A charging animation on the handset indicates that the battery is charging.

3. Leave it there until the batteries are fully charged (at least 24 hours).

4. The handset is fully charged when the charging animation stops and the battery icon is displayed.

---

**The handset must be charged for at least 24 hours before using it for the first time.**
Battery life and range

Talk time and stand-by time
When the battery is fully charged, the talk time of your SE635 is approximately 12 hours and the stand-by time is approximately 150 hours.

Low battery warning
The battery level is shown at the top left of the handset screen. When the battery level becomes low, the low battery sensor alerts you by sounding an audible tone and blinking the battery icon.

If the battery level becomes exceedingly low, the phone automatically switches off shortly after the alert and any function in progress will not be saved.

The approximate power levels of your battery are indicated as follows:
- Battery is fully charged - 3 bars in the battery icon
- Battery is partially charged - 2 bars in the battery icon
- Battery is running low - 1 bar in the battery icon
- Battery is fully discharged - 0 bar in the battery icon

Out of range warning
The indoor and outdoor range of the phone is up to 50 metres and 300 metres respectively. When the handset moves beyond operation range, the antenna icon will blink.

Configure your SE635
Before you use your SE635, you need to configure it according to the country of use. After charging it for a few minutes, the WELCOME screen appears. Follow these steps to configure your phone:

1. Press any key to display the list of countries.
2. Scroll to your country.
3. Press to confirm your selection.
4. Scroll to your operator (if necessary).
5. Press again to confirm your selection.
6. The default line settings and menu language for the selected country will be automatically configured.

You can still make outgoing calls or receive incoming calls without first defining your country selection.

Depending on your country, the WELCOME screen may not appear. In this case, you are not required to select your country/operator/language settings.
Install

Set date and time

1. Press \[ \text{MENU} \].
2. Scroll \[ \] to Clock & Alarm and press \[ \text{SELECT} \].
3. Press \[ \text{SELECT} \] to enter Set Date/Time.
4. Enter current time (HH:MM) and current date (DD/MM/YY) and press \[ \text{SELECT} \].

**WARNING** If your phone is connected to an ISDN line through an adapter, the date & time may be updated after each call. The availability of date & time update is dependent on your network provider. Please check the date & time settings in your ISDN system or contact your network provider.

Now, you are ready to use your phone.

Basic operations of your SE635

Make a call
Enter the phone number (maximum 24 digits) and press \[ \text{ } \] to dial the number.
For details, please refer to “Make a call” on page 18.

Answer or end a call
Press \[ \text{ } \] key to answer a call.
Press \[ \text{ } \] key to end a call.
For details, please refer to “Answer a call” and “End a call” on page 19.

Switch the handset on/off
Press and hold \[ \text{ } \] key for 5 seconds to switch off the handset in stand-by mode.
Short press \[ \text{ } \] key to switch on the handset again.

Keypad lock/unlock
Press and hold \[ \text{ } \] key for 2 seconds to lock and unlock the keypad in stand-by mode.

Paging
The paging feature enables you to locate a missing handset if the handset is in range and contains charged batteries.
Press \[ \text{ } \] key on the base until the handset starts to ring.
Once retrieved, press \[ \text{ } \] to end the paging.
Stand-by mode
If the handset is idle for 30 seconds in settings mode, review mode, edit mode, etc. it will automatically return to stand-by mode. It will also return to stand-by mode automatically when the handset is placed back on the base station.

Screen and keypad backlight
The backlight remains on for 20 seconds after each activation such as an incoming call, key presses, lifting up the handset off the base station, etc. The color of the keypad backlight is AMBER.

Event LED
The event LED on your handset blinks when there is a new message recorded on your telephone answering machine. If you have subscribed to Caller Line Identification, the event LED also blinks when there is a new call, a new SMS or a new voice mail message.

Call

Make a call

Predialling
1. Enter the phone number (maximum 24 digits).
2. Press \( \text{O} \) to dial the number.

Direct dialling
1. Press \( \text{O} \) or \( \text{Q} \) to take the line.
2. Enter the phone number.

Call from redial list
1. Press \( \text{N} \) in stand-by mode.
2. Scroll \( \text{O} \) to an entry in the redial list.
3. Press \( \text{O} \) to dial the number.

   **TIP** The handset stores the last 20 numbers dialled. The last number dialled will appear first in the redial list. If the redial number matches a phonebook entry, the name will be displayed instead.

Call from the call log
1. Press \( \text{C} \) in stand-by mode.
2. Press \( \text{C} \) \( \text{SELECT} \) to enter call log.
3. Scroll \( \text{O} \) to an entry in the call log.
4. Press \( \text{O} \) to dial the number.

   You need to subscribe to Caller Line Identification service to be able to see the caller’s number or name in the call log. See “Call log” on page 26 for details.

Call from the phonebook
1. Press \( \text{C} \) in stand-by mode.
2. Scroll \( \text{O} \) to a phonebook entry.
3. Press \( \text{O} \) to dial the number.

   **TIP** Instead of scrolling \( \text{O} \) to browse the phonebook entries, press the numeric key corresponding to the first letter of the entry you wish to locate. For example, pressing \( \text{6} \) will show the entries starting with A. Pressing \( \text{6} \) again will show the entries starting with B, etc..
Call

Answer a call

When the phone rings, press \textit{Answer a call} key.

Handsfree answering

When the phone rings, press \textit{Handsfree answering} key.

\begin{itemize}
\item Incoming call has priority over other events. Whenever there is an incoming call, other status in progress such as phone setting, menu navigation, etc will be aborted.
\item If Auto Pick-up mode (see page 39) is activated, you can simply lift up the handset from its base station to answer the call. This feature is deactivated by default.
\item WARNING: When the handset rings during an incoming call, please do not hold the handset too close to your ear as the volume of the ringing tone may damage your hearing.
\end{itemize}

End a call

Press \textit{End a call} key.

\begin{itemize}
\item The call duration will be displayed on the handset screen for about 5 seconds.
\item If Auto Hang-up mode (see page 39) is activated, you can simply place the handset back to its base station to end the call. This feature is activated by default.
\end{itemize}

Calls in-progress

The following options are available during a call:

\textbf{Adjust earpiece volume}

1. Press \textit{Adjust earpiece volume} to select from Volume 1 to Volume 5.

\textbf{Mute/unmute the handset}

1. During a call, press \textit{Mute/unmute the handset} to turn off the microphone so that your correspondent cannot hear you.
2. Press \textit{Mute/unmute the handset} to turn on the microphone.

\textbf{Loudspeaker mode}

1. Press \textit{Loudspeaker mode} key to activate loudspeaker mode.
EN Call

2. Press key again to return to normal mode.

WARNING Activation of loudspeaker can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

Adjust loudspeaker volume
1. Press key to select from Volume 1 to Volume 5.

Intercom
This feature is only available when there are at least 2 registered handsets. It allows you to make free internal calls, transfer external calls from one handset to another and use the conference option.

Intercom another handset
To be able to use intercommunication feature, you must have at least 2 handsets registered to your base station (see page 44 "To register an additional handset").

1. Press key in stand-by mode.

2. Intercom is established immediately if there are only 2 registered handsets. If there are more than 2 registered handsets, the handset numbers which are available for intercom will be displayed. Press all to call all the handsets or press the handset number to select a specific handset, e.g. press to call handset 2.

   [If the handset does not belong to SE630/635 range, this function may not be available.]

Transfer an external call to another handset
1. Press key to put the external call on hold (the caller can no longer hear you).

2. Intercom is established immediately if there are only 2 registered handsets. If there are more than 2 registered handsets, the handset numbers which are available for intercom will be displayed. Press all to call all the handsets or press the handset number to select a specific handset, e.g. press to call handset 2.

   The called handset rings.

3. Press key on the called handset to answer the internal call, where both internal callers can talk.

4. Press key on the first handset to transfer the external call to the called handset.

Switch between an internal and external call
1. Press key once to switch between an internal call and external call.
Three-party conference call

The conference call feature allows one external call to be shared with two handsets (in intercom). The three parties can share the conversation and no network subscription is required.

1. Press \( \text{c} \) to put the external call on hold (the caller can no longer hear you).
2. Intercom is established immediately if there are only 2 registered handsets. If there are more than 2 registered handsets, the handset numbers which are available for establishing a conference call will be displayed. Press \( \text{m ALL} \) to call all the handsets or press the handset number to select a specific handset, e.g. press \( \text{2} \) to call handset 2.
   The called handset rings.
3. Press \( \text{r} \) key on the called handset to answer the internal call, where both internal callers can talk.
4. Press CONF soft key on the first handset to start the three-party conference.

TIP If Conference mode is activated (see page 47), a three-party conference call is automatically established if the second handset takes the line when there is already an external call in progress.

Call waiting

If you have subscribed to Call Waiting service, the earpiece will emit a beep tone to inform you that there is a second incoming call. The number or name of the second caller will also be displayed if you have subscribed to Caller Line Identification service (CLI). Please contact your network provider for more information on this service.

To answer the second call, press \( \text{a} + \text{2} \) (may be different according to your network).

Caller Line Identification

Caller Line Identification (CLI) is a special service that you may subscribe from your network operator. If you have subscribed to CLI service, and provided the identity of the caller is not withheld, the number or name of the caller (if stored in the phonebook) will be displayed when the phone rings so that you may decide whether to answer the call or not. Please contact your network provider for more information on this service.
Your SE635 phone can store up to 250 phonebook memories, including 9 direct access memories (1 to 9).
Each phonebook entry can have a maximum of 24 digits for the phone number and 12 characters for the name.

Access phonebook

1. Press * in standby mode or press \( \text{MENU} \) scroll \( \uparrow \) to Phonebook and press \( \text{SELECT} \), scroll \( \uparrow \) to List Entry and press \( \text{SELECT} \).
2. The phonebook entries will be listed in alphabetical order.
3. Press \( \uparrow \) to browse the phonebook.

To view the details of a phonebook entry, press \( \text{VIEW} \).
To dial a number from the phonebook, scroll \( \uparrow \) to the phonebook entry and press \( \text{ок} \).

TIP Instead of scrolling \( \uparrow \) to browse the phonebook entries, you can press the numeric key corresponding to the first letter of the entry you wish to locate. For example, pressing \( 2 \) will show the entries starting with A. Pressing \( 2 \) again will show the entries starting with B, etc...

Store a contact in the phonebook

1. Press \( \text{MENU} \) scroll \( \uparrow \) to Phonebook and press \( \text{SELECT} \), press \( \text{SELECT} \) to enter New Entry.
2. Enter the name of the contact (maximum 12 characters) and press \( \text{OK} \).
3. Enter the number (maximum 24 digits) and press \( \text{OK} \).
4. Enter the SMS Box number and press \( \text{OK} \) (only for UK).
Phonebook

5. Scroll \( \rightarrow \) to choose a group (<No Group>, <Group A>, <Group B>, <Group C>) and press \( \equiv \) SELECT to confirm. 
   A long confirmation beep tone is emitted.

You can assign individual contacts to specific groups of your choice. For example, Group A contains phone numbers of all your co-workers. You can also assign a specific ring melody to that group (see "Group Melody" on page 37). If you have subscribed to Caller Line Identification service from your network provider, every time someone from that group calls you, you will hear the designated ringtone for that group.

TIP You can store up to 250 phonebook entries. You cannot store a new phonebook entry when the memory is full. In this case, you have to delete existing entries to make space for new entries.

Edit a phonebook entry

1. Press \( \equiv \) MENU, scroll \( \rightarrow \) to Phonebook and press \( \equiv \) SELECT, scroll \( \rightarrow \) to Edit Entry and press \( \equiv \) SELECT.
2. Scroll \( \rightarrow \) to the entry you wish to edit and press \( \equiv \) SELECT.
3. Press \( \equiv \) CLEAR to erase the letters one by one, edit the name and press \( \equiv \) OK.
4. Press \( \equiv \) CLEAR to erase the digits one by one, edit the number and press \( \equiv \) OK.
5. Enter the SMS Box number and press \( \equiv \) OK (only for UK).
6. Scroll \( \rightarrow \) to a group (<No Group>, <Group A>, <Group B>, <Group C>) and press \( \equiv \) OK to confirm.
   A long confirmation beep tone is emitted.

Delete a phonebook entry

1. Press \( \equiv \) MENU, scroll \( \rightarrow \) to Phonebook and press \( \equiv \) SELECT, scroll \( \rightarrow \) to Delete Entry and press \( \equiv \) SELECT.
2. Scroll to the entry you wish to delete and press \( \equiv \) SELECT.
   A long confirmation beep tone is emitted.

Delete all phonebook entries

1. Press \( \equiv \) MENU, scroll \( \rightarrow \) to Phonebook and press \( \equiv \) SELECT, scroll \( \rightarrow \) to Delete All and press \( \equiv \) SELECT.
2. Press \( \equiv \) SELECT again to confirm.
   A long confirmation beep tone is emitted.
Phonebook

Store direct access memory

You can store up to 9 direct access memories (Key 1 to 9). A long press on the keys in stand-by mode will automatically dial the stored phone number.

1. Press MENU, scroll to Phonebook and press SELECT, scroll to Direct Memory and press SELECT.
2. Select a key (Key 1 to Key 9) and press VIEW. If there is a stored number in that key, the number/name will be displayed.
3. If there is no number stored for the selected key or if you want to change the number currently stored, press SELECT and press SELECT again to select Add.
4. Press OK to display the phonebook list and scroll to the entry you wish to store as direct access memory.
5. Press OK to confirm.
A long confirmation beep tone is emitted.

Delete a direct access memory

1. Press MENU, scroll to Phonebook and press SELECT, scroll to Direct Memory and press SELECT.
2. Select a key (Key 1 to Key 9) and press VIEW.
3. Press MENU and scroll to Delete.
4. Press OK to confirm.
A long confirmation beep tone is emitted.

Copy phonebook from SIM card

This feature allows you to copy the SIM card phonebook of your mobile phone to the phonebook of your handset.

1. Open the SIM card tray and remove it from the base station.

Remove SIM card tray
2. Slide the SIM card between the retaining clips, microchip facing up, until it stops.

3. Put the SIM card tray back in the slot on the base station and push into place until it latches.

4. On the handset, press \textit{\textbf{MENU}}, scroll \rightarrow to Phonebook and press \textit{\textbf{SELECT}}, scroll \rightarrow to Copy from SIM and press \textit{\textbf{SELECT}}.

5. Scroll \rightarrow to Copy All or Select Entry. If you choose Copy All then all entries in the SIM card will be copied to your phonebook. If you choose Select Entry, you can browse the SIM card entries and select the ones you wish to copy.

6. Press \textit{\textbf{SELECT}} to confirm.

7. Enter the PIN code of the SIM card (if required). The copy progress will be displayed on the screen.

8. A message Transferred! will be displayed upon successful completion.

Transfer phonebook

This feature allows you to transfer the phonebook from one handset to another handset when there are at least 2 handsets registered to your base station.

1. Press \textit{\textbf{MENU}}, scroll \rightarrow to Phonebook and press \textit{\textbf{SELECT}}, scroll \rightarrow to Phbk transfer and press \textit{\textbf{SELECT}}.

2. The handset numbers which are available for transfer will be displayed. If there are more than 2 handsets, you can scroll \rightarrow to select a specific handset.

3. Press \textit{\textbf{SELECT}} to confirm.

4. The called handset will be prompted with a message Transfer from Handset X.

5. To accept the transfer of phonebook, press \textit{\textbf{SELECT}} on the called handset; to reject the transfer, press \textit{\textbf{SELECT}}

6. A message Transferred! will be displayed upon successful completion.
Call log

The call log can store up to 50 entries. If you have subscribed to Caller Line Identification (CLI), and provided the identity of the caller is not withheld, the name (or number) of the caller will be displayed together with the date & time of the call (if provided by the network). The calls (missed and received) are displayed in chronological order with the most recent call at the top of the list. When the call log is empty, the screen displays List Empty.

Access call log

1. Press \( \text{\textasciicircum} \) in stand-by mode, press \( \text{\textasciicircum}\text{SELECT} \) to enter Call Log and scroll \( \text{\textasciicircum} \) to view the entries.

Save call log entry to phonebook

1. Press \( \text{\textasciicircum} \) in stand-by mode, press \( \text{\textasciicircum}\text{SELECT} \) to enter Call Log and scroll \( \text{\textasciicircum} \) to select an entry.
2. Press \( \text{\textasciicircum}\text{SELECT} \) and press \( \text{\textasciicircum}\text{SELECT} \) again to Copy to Phbk.
3. Enter name and press \( \text{\textasciicircum}\text{OK} \).
4. Edit number if necessary and press \( \text{\textasciicircum}\text{OK} \).
5. Enter the SMS Box number and press \( \text{\textasciicircum}\text{OK} \) (only for UK).
6. Scroll \( \text{\textasciicircum} \) to choose a group (\( \text{\textasciicircum}\text{No Group}\), \( \text{\textasciicircum}\text{Group A}\), \( \text{\textasciicircum}\text{Group B}\), \( \text{\textasciicircum}\text{Group C}\)) and press \( \text{\textasciicircum}\text{SELECT} \) to confirm.

A long confirmation beep tone is emitted.

Delete call log entry

1. Press \( \text{\textasciicircum} \) in stand-by mode, press \( \text{\textasciicircum}\text{SELECT} \) to enter Call Log and scroll \( \text{\textasciicircum} \) to select an entry.
2. Press \( \text{\textasciicircum}\text{SELECT} \) and scroll \( \text{\textasciicircum} \) to Delete.
3. Press \( \text{\textasciicircum}\text{SELECT} \) to confirm.

A long confirmation beep tone is emitted.

Delete all call log

1. Press \( \text{\textasciicircum} \) in stand-by mode, press \( \text{\textasciicircum}\text{SELECT} \) to enter Call Log.
2. Press \( \text{\textasciicircum}\text{SELECT} \) and scroll \( \text{\textasciicircum} \) to Delete All and press \( \text{\textasciicircum}\text{SELECT} \).
3. Press \( \text{\textasciicircum}\text{SELECT} \) again to confirm.

A long confirmation beep tone is emitted.

Access redial list

1. Press \( \text{\textasciicircum}\text{\textasciicircum} \) in stand-by mode and scroll \( \text{\textasciicircum} \) to view the entries.
Call log

View details of a redial list entry

1. Press > in stand-by mode and scroll  to select an entry.
2. Press SELECT and press SELECT again to View.

Save redial list entry to phonebook

1. Press > in stand-by mode and scroll  to select an entry.
2. Press SELECT, scroll  to Copy to Phbk and press SELECT.
3. Enter name and press OK.
4. Edit number if necessary and press OK.
5. Enter the SMS Box number and press OK (only for UK).
6. Scroll  to choose a group (<No Group>, <Group A>, <Group B>, <Group C>) and press SELECT to confirm.
   A long confirmation beep tone is emitted.

Delete a number from redial list

1. Press > in stand-by mode and scroll  to select an entry.
2. Press SELECT and scroll  to Delete and press SELECT.
   A long confirmation beep tone is emitted.

Delete all redial list

1. Press > in stand-by mode.
2. Press SELECT and scroll  to Delete All and press SELECT.
3. Press SELECT again to confirm.
   A long confirmation beep tone is emitted.
SMS stands for Short Message Service. To benefit from this service, you must subscribe to Caller Line Identification Service (CLI) together with SMS service from your network provider. SMS messages can be exchanged with a phone (mobile or compatible fixed lines), provided the receiver has also subscribed to CLI and SMS services.

The factory settings on your SE635 correspond to the main national operator. If you wish to send or receive SMS messages through another service provider, you must set the corresponding numbers (see page 33).

You can create up to 10 SMS boxes (Box 0 to Box 9) and protect each box with a password (only for UK). Your SE635 can store up to 50 SMS messages (40 SMS in the Inbox and 10 SMS in the Draft box) shared by all the SMS boxes and the maximum length of each message is 160 characters.

In order to send and receive SMS messages, there must be at least one SMS Box. Box 9 with empty password is created by default (only for UK). For more information, please refer to "SMS Box (only for UK)" on page 32.

Write and send new SMS

1. Press [MENU], press [SELECT] to enter SMS, press [SELECT] again to enter Write a SMS.
2. Scroll [ ] to the desired SMS Box (Box 0 to Box 9) and press [SELECT] to enter password (only for UK).
3. Enter the password (if needed) and press [OK].
4. Enter the text and press [OK].

You can enter up to 160 characters for an SMS.

If you receive a call while writing an SMS, the operation will be interrupted. However, your SMS will be saved in the Draft box. To retrieve it, go to Draft box in your SMS menu (see page 31).
5. Enter the destination phone number and press \( \text{OK} \). Or press \( \text{PHBK} \) to browse the phonebook list to select a phone number, press \( \text{SELECT} \) and press \( \text{OK} \).

6. Enter the destination box number (0 to 9) directly and press \( \text{OK} \) (only for UK).

By default, the destination box is 9 (the default destination box depends on the country).

7. Press \( \text{SELECT} \) to Send the message or scroll \( \text{to} \) Save as Draft to save the message in the Draft box and press \( \text{SELECT} \) to confirm.

8. If you select Send, the message will be sent immediately. SMS Sent! will be displayed if the message has been sent successfully.

If the message cannot be sent successfully, the screen will display SMS not Sent! and the message will be saved in the Draft box.

WARNING When composing your SMS, if no keys are pressed for 60 seconds, the handset will return to stand-by mode. The edited message will be automatically saved in the Draft box.

---

**Inbox**

The messages in the Inbox are listed according to the time of receipt, with the newest message appearing first. The Inbox can store up to 40 messages (shared between Box 0 to Box 9).

Each time an SMS is received, you will be alerted by a beep tone (see "SMS Tone" on page 37) and the screen displays the number of new messages received. If LED is activated, the event LED will blink until the SMS has been reviewed.

**WARNING** When the message box is full, you will not be able to receive new messages. In this case, you need to delete some old messages in order to receive new ones.

**View Inbox messages**

1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{to} \) Inbox press \( \text{SELECT} \).

2. Scroll \( \text{to} \) your desired box number and press \( \text{SELECT} \) (only for UK).

3. Enter the password and press \( \text{OK} \) (Password is not required for Box 9).

4. Browse the list of SMS messages and select the message you wish to read. The message list will be displayed with the sender’s phone number or corresponding name (if the number matches the phonebook record).

5. Press \( \text{VIEW} \) to view the message content.

**TIP** While reading an SMS, press \( \text{to} \) scroll to the next or previous row. At the end of the message, the sender’s phone number and the date and time of reception are shown.
When viewing the message content, you can press \( \text{Menu} \) to access the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reply</td>
<td>Send a reply to the sender of the message.</td>
</tr>
<tr>
<td>Edit</td>
<td>Forward the message to another recipient.</td>
</tr>
<tr>
<td>Copy to Phbk</td>
<td>Save the sender’s number to your phonebook.</td>
</tr>
<tr>
<td>Delete</td>
<td>Delete the selected message.</td>
</tr>
<tr>
<td>Delete All</td>
<td>Delete all messages in the Inbox.</td>
</tr>
</tbody>
</table>

To return to SMS menu, press \( \text{Menu} \).

Press \( \text{Menu} \) while viewing the message content/sender number/date/time stamp will abort the SMS function and dial the sender’s phone number.

Press \( \text{Menu} \) to return to Inbox message list.

### Reply to an Inbox message
1. While viewing the message content, press \( \text{Menu} \) to display the Inbox menu options.
2. Scroll \( \text{Menu} \) to Reply and press \( \text{Menu} \) \( \text{Select} \) to start editing.
3. After editing, press \( \text{Menu} \) \( \text{OK} \) to confirm the message.
4. Refer to steps 5 to 7 in “Write and send new SMS” on page 28 to send the message or select Save as Draft to save the message in the Draft box.

### Forward an Inbox message
1. While viewing the message content, press \( \text{Menu} \) to display the Inbox menu options.
2. Scroll \( \text{Menu} \) to Edit and press \( \text{Menu} \) \( \text{Select} \) to start editing it if you wish.
3. After editing, press \( \text{Menu} \) \( \text{OK} \) to confirm message.
4. Refer to steps 5 to 7 in “Write and send new SMS” on page 28 to forward the message or select Save To Draft to save the message in the Draft box.

### Save sender’s phone number to phonebook
1. While viewing the message content, press \( \text{Menu} \) to display the Inbox menu options.
2. Scroll \( \text{Menu} \) to Copy to Phbk and press \( \text{Menu} \) \( \text{Select} \) to enter a name for this new contact.
3. Enter the name and press \( \text{Menu} \) \( \text{OK} \) to modify number.
4. To confirm the number, press \( \text{Menu} \) \( \text{OK} \) again.
5. Enter the SMS Box number and press \( \text{Menu} \) \( \text{OK} \) (only for UK).
6. Scroll \( \text{Menu} \) to select a group you wish to assign for this contact and press \( \text{Menu} \) \( \text{Select} \) to confirm.
   A long confirmation beep is emitted and the screen returns to display the message content.

### Delete an Inbox message
1. While viewing the message content, press \( \text{Menu} \) to display the Inbox menu options.
2. Scroll \( \text{Menu} \) to Delete and press \( \text{Menu} \) \( \text{Select} \) to confirm deletion.
Delete all Inbox messages
1. While viewing the message content, press \[ \text{MENU} \] to display the Inbox menu options.
2. Scroll to Delete All and press \[ \text{SELECT} \].
3. Press \[ \text{SELECT} \] again to confirm deletion.

Draft box
In addition to SMS messages saved as drafts, all the SMS messages that are not successfully sent will be automatically stored in the Draft box. The Draft box can store up to 10 messages.

Review Draft messages
1. Press \[ \text{MENU} \], press \[ \text{SELECT} \] to enter SMS, scroll to Draft box and press \[ \text{SELECT} \].
2. Scroll to your desired box number and press \[ \text{SELECT} \] (only for UK).
3. Enter the password and press \[ \text{OK} \] (Password is not required for Box 9).
4. Browse the list of SMS messages and select the message you wish to review.
5. Press \[ \text{VIEW} \] to view the message content.
6. When viewing the message content, you can press \[ \text{MENU} \] to access the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Send</td>
<td>Send the message immediately.</td>
</tr>
<tr>
<td>Edit</td>
<td>Edit the message and send or save as draft.</td>
</tr>
<tr>
<td>Delete</td>
<td>Delete the message.</td>
</tr>
<tr>
<td>Delete All</td>
<td>Delete all messages in the Draft box.</td>
</tr>
</tbody>
</table>

Send a message from Draft box
1. While viewing the message content, press \[ \text{MENU} \] to display the Draft box menu options.
2. Press \[ \text{SELECT} \] to Send the message.
3. Press \[ \text{SELECT} \] again to confirm or scroll to Save as Draft to save the message in the Draft box and press \[ \text{SELECT} \].
4. If you select Send, the message will be sent immediately. SMS Sent! will be displayed if the message has been sent successfully.

Edit a Draft message
1. While viewing the message content, press \[ \text{MENU} \] to display the Draft box menu options.
2. Scroll to Edit and press \[ \text{SELECT} \] to start editing.
3. After editing, press \[ \text{OK} \] to confirm message.
4. Refer to steps 5 to 7 in "Write and send new SMS" on page 28 to send the message or select Save as Draft to save the message in the Draft box.

Delete a Draft message
1. While viewing the message content, press \[ \text{MENU} \] to display the Draft box menu options.
2. Scroll \[\text{Up}\] to Delete and press \[\text{SELECT}\] to confirm deletion.

Delete all Draft messages
1. While viewing the message content, press \[\text{MENU}\] to display the Draft box menu options.
2. Scroll \[\text{Up}\] to Delete All and press \[\text{SELECT}\].
3. Press \[\text{SELECT}\] again to confirm deletion.

SMS settings

This menu allows you to set up the server for sending and receiving SMS messages. Your SE635 can receive messages from 3 service centers.

Each service center consists of 2 numbers:
- Incoming number
- Outgoing number

The maximum length of an incoming/outgoing number is 24 digits.

The incoming and outgoing numbers of your SE635 are already set to work on your country network. We advise you not to modify these settings. For more details or in case of any problems, please contact your local network provider.

SMS reception

Your SE635 can receive SMS messages from another phone if you have subscribed to the CLI and SMS services from your network provider. By default, SMS reception is set to On so that you can receive SMS messages.

To activate or deactivate the reception of SMS
1. Press \[\text{MENU}\], press \[\text{SELECT}\] to enter SMS, scroll \[\text{Up}\] to SMS Settings and press \[\text{SELECT}\], press \[\text{SELECT}\] to enter SMS Reception.
2. Scroll \[\text{Up}\] to On or Off and press \[\text{SELECT}\] to confirm.

Even if SMS reception is Off, you can still send SMS messages.

SMS Box (only for UK)

In order to send and receive SMS messages, there must at least be 1 SMS Box created. Box 0 with empty password is created by default.

You can create a maximum of 10 SMS boxes (Box 0 to Box 9), and you can protect each box with a password.

To create a new SMS Box (only for UK)
1. Press \[\text{MENU}\], press \[\text{SELECT}\] to enter SMS, scroll \[\text{Up}\] to SMS Settings and press \[\text{SELECT}\], scroll \[\text{Up}\] to SMS Boxes and press \[\text{SELECT}\].
2. Press \[\text{MENU}\] and press \[\text{SELECT}\] to Add New Box.
1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{sms} \) to SMS Settings and press \( \text{SELECT} \).

2. Scroll \( \text{sms} \) to SMS Boxes and press \( \text{SELECT} \).

3. Scroll \( \text{sms} \) to Change Passwd and press \( \text{SELECT} \).

4. Enter old password and press \( \text{OK} \).

5. Enter new password, press \( \text{OK} \) and enter the new password again for confirmation.

6. Press \( \text{OK} \) to confirm password change.

To change the box number of an SMS Box (only for UK)

1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{sms} \) to SMS Settings and press \( \text{SELECT} \).

2. Scroll \( \text{sms} \) to SMS Boxes and press \( \text{SELECT} \).

3. Scroll \( \text{sms} \) to Change Box Nr and press \( \text{SELECT} \).

4. Enter the new box number and press \( \text{OK} \) to confirm box number change.

To set outgoing number

The incoming and outgoing numbers of your SE635 are already set to work on your country network. We advise you not to modify these settings. For more details or in case of any problems, please contact your local network provider.

1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{sms} \) to SMS Settings and press \( \text{SELECT} \).

2. Scroll \( \text{sms} \) to SMS Center 1, SMS Center 2 or SMS Center 3 and press \( \text{SELECT} \).

3. Press \( \text{SELECT} \) to enter Outgoing Nr.
3. Enter the number and press \( \text{OK} \) to confirm.
   A confirmation beep is emitted.

The maximum length of an outgoing number is 24 digits.

To set incoming number
1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{to SMS Settings and press \( \text{SELECT} \), scroll \( \text{to SMS Center 1, SMS Center 2 or SMS Center 3 and press \( \text{SELECT} \).}
2. Scroll \( \text{to Incoming Nr. and press \( \text{SELECT} \).
3. Enter the number and press \( \text{OK} \) to confirm.
   A confirmation beep is emitted.

The maximum length of an incoming number is 24 digits.

Default SMS center
The default SMS center number is 1.

To set default SMS center
1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{to SMS Settings and press \( \text{SELECT} \), scroll \( \text{to Default Ctr. and press \( \text{SELECT} \).}
2. Scroll \( \text{to SMS center that you wish to set as default center (SMS Center 1, SMS Center 2 or SMS Center 3) and press \( \text{SELECT} \).
   A confirmation beep is emitted.

1st ring
When this function is set to \( \text{Off} \), the first ring from a voice call will not sound. This is particularly useful in countries where calling line identity is sent after the first ring, so no phones in the house would ring when a message arrives.

To set 1st ring
1. Press \( \text{MENU} \), press \( \text{SELECT} \) to enter SMS, scroll \( \text{to SMS Settings and press \( \text{SELECT} \), scroll \( \text{to Set 1st Ring and press \( \text{SELECT} \).
2. Scroll \( \text{to On or Off and press \( \text{SELECT} \) to confirm.
Set date and time
1. Press \( \text{MENU} \), scroll \( \uparrow \) to Clock & Alarm and press \( \text{SELECT} \), press \( \text{SELECT} \) again to enter Set Date/Time.
2. Enter the current time (HH:MM) and current date (DD/MM/YY) and press \( \text{SELECT} \).
3. A confirmation beep is emitted and the screen returns to Clock & Alarm menu.

Set Alarm
1. Press \( \text{MENU} \), scroll \( \uparrow \) to Clock & Alarm and press \( \text{SELECT} \), scroll \( \uparrow \) to Alarm and press \( \text{SELECT} \).
2. Scroll \( \uparrow \) to Off, On Once or On Daily and press \( \text{SELECT} \).
3. If you have selected On Once or On Daily, enter the time for the alarm and press \( \text{SELECT} \).
   A confirmation beep is emitted and the screen returns to previous menu.

Alarm tone
1. Press \( \text{MENU} \), scroll \( \uparrow \) to Clock & Alarm and press \( \text{SELECT} \), scroll \( \uparrow \) to Alarm Tone and press \( \text{SELECT} \).
2. Scroll \( \uparrow \) to the desired melody (Melody 1, Melody 2 or Melody 3) to play the melody.
3. Press \( \text{SELECT} \) to set the alarm tone.
EN Personal Settings

Handset Tones

Ring Volume
There are 5 ringer volume options (Silence, Low, Medium, High and Progressive). The default level is Medium.

To set ring volume
1. Press \( \text{MENU} \), scroll \( \uparrow \) to Personal Set and press \( \text{SELECT} \), press \( \text{SELECT} \) to enter Handset Tones and press \( \text{SELECT} \) again to enter Ring Volume.
2. Scroll \( \uparrow \) to your desired volume level and press \( \text{SELECT} \) to confirm.

A confirmation beep is emitted and the screen returns to previous menu.

Ring Melody
There are 10 ring melodies available on your handset.

To set Ring Melody
1. Press \( \text{MENU} \), scroll \( \uparrow \) to Personal Set and press \( \text{SELECT} \), press \( \text{SELECT} \) to enter Handset Tones, scroll \( \uparrow \) to Ring Melody and press \( \text{SELECT} \).
2. Scroll \( \uparrow \) to your desired melody to play the melody.

WARNING When the handset rings during an incoming call, please do not hold the handset too close to your ear as the volume of the ringing tone may damage your hearing.
37

Personal Settings

3. Press **SELECT** to set the ring melody.
   A confirmation beep is emitted and the screen returns to previous menu.

Group Melody
To benefit from this feature, you must subscribe to the Caller Line Identification service. See "Caller Line Identification" on page 21.

This menu enables you to select and set the melodies to be played when there is an external incoming call from a contact whose name is stored in your phonebook and is part of a group. You can associate 1 ring melody to each group.

There are three phonebook groups (Group A, B, C) available for you to organize your contacts. Each group can be assigned a unique melody.

To set Group Melody
1. Press **MENU**, scroll **Personal Set** and press **SELECT**, press **SELECT** to enter Handset Tones, scroll **Group Melody** and press **SELECT**.
2. Scroll **to the group for which you wish to set melody and press **SELECT**.
3. Scroll **to the desired melody to play the melody.
4. Press **SELECT** to set the group melody.
   A confirmation beep is emitted and the screen returns to previous menu.

Key Beep
A single beep is emitted when a key is pressed. You can enable or disable this key beep. By default, the key beep is On.

To set key beep On/Off
1. Press **MENU**, scroll **Personal Set** and press **SELECT**, press **SELECT** to enter Handset Tones, scroll **Key Beep** and press **SELECT**.
2. Scroll **to On or Off and press **SELECT** to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

SMS Tone
A tone is emitted when a new SMS is received. You can enable or disable this SMS Tone. By default, SMS tone is On.

To set SMS tone On/Off
1. Press **MENU**, scroll **Personal Set** and press **SELECT**, press **SELECT** to enter Handset Tones, scroll **SMS Tone** and press **SELECT**.
2. Scroll **to On or Off and press **SELECT** to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.
Personal Settings

Wallpaper

This feature allows you to select the wallpaper to be displayed in stand-by mode. There are 4 wallpapers pre-installed on your phone. Please see "Default settings" on page 17 for the default wallpaper.

To set wallpaper
1. Press \( \text{\texttt{MENU}} \), scroll \( \text{\texttt{h}} \) to Personal Set and press \( \text{\texttt{SELECT}} \), scroll \( \text{\texttt{h}} \) to Wallpaper and press \( \text{\texttt{SELECT}} \).
2. Scroll \( \text{\texttt{h}} \) to your desired wallpaper and press \( \text{\texttt{SELECT}} \) to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Contrast level

There are 3 contrast level options (Level 1, Level 2 or Level 3). The default contrast level is Level 2.

To set contrast level
1. Press \( \text{\texttt{MENU}} \), scroll \( \text{\texttt{h}} \) to Personal Set and press \( \text{\texttt{SELECT}} \), scroll \( \text{\texttt{h}} \) to Contrast and press \( \text{\texttt{SELECT}} \).
2. Scroll \( \text{\texttt{h}} \) to your desired contrast level (Level 1, Level 2 or Level 3) and press \( \text{\texttt{SELECT}} \) to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Screensaver

Screensaver will be activated automatically after 1 minute in stand-by mode.

To set screensaver
1. Press \( \text{\texttt{MENU}} \), scroll \( \text{\texttt{h}} \) to Personal Set and press \( \text{\texttt{SELECT}} \), scroll \( \text{\texttt{h}} \) to Screensaver and press \( \text{\texttt{SELECT}} \).
2. Scroll \( \text{\texttt{h}} \) to On or Off and press \( \text{\texttt{OK}} \) to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Handset Name

You can name the handset and display the handset name in stand-by mode. The default handset name of your handset is PHILIPS.

To rename the handset
1. Press \( \text{\texttt{MENU}} \), scroll \( \text{\texttt{h}} \) to Personal Set and press \( \text{\texttt{SELECT}} \), scroll \( \text{\texttt{h}} \) to Handset Name and press \( \text{\texttt{SELECT}} \).
Personal Settings

2. Edit the handset name and press OK to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

   Maximum length of the handset name is 12 characters and the default handset name is PHILIPS.

Auto Pick-up

This function enables you to answer a call automatically by simply lifting the handset from the base station. By default, the Auto Pick-up feature is Off.

To set Auto Pick-up mode
1. Press MENU, scroll to Personal Set and press SELECT, scroll to Auto Pick-up and press SELECT.
2. Scroll to On or Off and press SELECT to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Auto Hang-up

This function enables you to end a call automatically by simply replacing the handset on the base station. By default, the Auto Hang-up feature is On.

To set Auto Hang-up mode
1. Press MENU, scroll to Personal Set and press SELECT, scroll to Auto Hang-up and press SELECT.
2. Scroll to On or Off and press SELECT to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Language

Your SE635 can support different display languages.

To change the language
1. Press MENU, scroll to Personal Set and press SELECT, scroll to Language and press SELECT.
2. Scroll to your desired language and press SELECT to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.
Personal Settings

Babysit mode

You must have at least 2 handsets registered to your base station to be able to use this feature (see page 44 "To register an additional handset").

This feature allows you to monitor, e.g. the baby's room. Place the handset in the room to be monitored. If the sound level around the microphone of the handset exceeds a certain threshold, the handset can automatically call another handset registered on the same base station.

To use the Babysit feature you need to activate it (e.g. on handset 1) and enter the number of the handset to be called (e.g. handset 2) in the event that there are noises in the monitored room. Place the handset which is in Babysit mode (e.g. handset 1) in the room to be monitored. If this handset detects a sound level greater than a certain threshold, it will automatically initiate an internal call to the selected handset (e.g. handset 2).

To activate Babysit mode
1. Press \[ \text{MENU} \], scroll \( \uparrow \) to Personal Set and press \[ \text{SELECT} \], scroll \( \uparrow \) to Babysit mode and press \[ \text{SELECT} \].

2. Enter the number of the handset you wish to call to and press \[ \text{OK} \] to activate.

To deactivate Babysit mode
1. Press \[ \text{MENU} \], select \( \text{Off} \) and press \[ \text{OK} \].
Recall time (or dial delay) is the time delay by which the line will be disconnected after you press the key. It can be set to short, medium or long.

The default value of recall time that is preset in your SE635 should be the best suited for your country network and therefore you should not need to change it.

To set recall time:
1. Press the MENU button, scroll to Advanced Set and press SELECT and press SELECT to enter Recall Time.
2. Scroll to select Short / Medium / Long and press SELECT to confirm.

A confirmation beep is emitted and the screen returns to previous menu.

This setting is useful when using network services. The use of some services accessed with [ + 1], [ + 2], [ + 3] (call waiting, call forward...) will depend on your recall time setting. Please contact your network provider for more details on this feature.
Advanced Settings

Dial Mode

The default value for dial mode that is preset in your SE635 should be the best suited for your country network and therefore you should not need to change it.

There are 2 dial modes: Tone or Pulse.

To set dial mode
1. Press \( \mathcal{M} \) MENU, scroll \( \downarrow \) to Advanced Set and press \( \mathcal{C} \) SELECT, scroll \( \downarrow \) to Dial Mode and press \( \mathcal{C} \) SELECT.
2. Scroll \( \downarrow \) to Tone or Pulse and press \( \mathcal{C} \) SELECT to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Call Barring

Call barring enables you to restrict selected handsets from dialling a phone number beginning with certain numbers. You can set up to four different barring numbers, with each number containing up to 4 digits.

If you have modified the Master PIN before and it is not the default 0000, you will be required to enter the Master PIN before you can activate or deactivate call barring mode, add or modify call barring number.

To activate/deactivate Call Barring mode
1. Press \( \mathcal{M} \) MENU, scroll \( \downarrow \) to Advanced Set and press \( \mathcal{C} \) SELECT, scroll \( \downarrow \) to Call Barring and press \( \mathcal{C} \) SELECT.
2. Enter the Master PIN when prompted and press \( \mathcal{C} \) OK to confirm.
3. Press \( \mathcal{C} \) SELECT to enter Barring Mode.
4. Scroll \( \downarrow \) to On or Off and press \( \mathcal{C} \) SELECT to confirm.
   A confirmation tone is emitted and the screen returns to previous menu.

To modify Call Barring number
1. Press \( \mathcal{M} \) MENU, scroll \( \downarrow \) to Advanced Set and press \( \mathcal{C} \) SELECT, scroll \( \downarrow \) to Call Barring and press \( \mathcal{C} \) SELECT.
2. Enter the Master PIN when prompted and press \( \mathcal{C} \) OK to confirm.
3. Press \( \mathcal{C} \) to Barring Number and press \( \mathcal{C} \) SELECT.
4. Scroll \( \downarrow \) to Number 1, Number 2, Number 3 or Number 4 and press \( \mathcal{C} \) SELECT to confirm.
5. Enter a maximum of 4 digits and press \( \mathcal{C} \) OK to confirm.
   A confirmation beep is emitted and the screen returns to stand-by mode.

If a restricted number is dialled, the call will not be connected. When this happens, the phone emits an error tone and returns to stand-by mode.
Baby Call

When activated, the Baby Call feature enables you to dial a number by pressing any key on your handset. This feature is very useful for direct access to emergency services.

You can enter up to 24 digits for baby call number.

If you have modified the Master PIN before and it is not the default 0000, you will be required to enter the Master PIN before you can activate or deactivate Baby Call mode or change Baby Call number.

To activate Baby Call mode
1. Press \[ \text{MENU} \] scroll \[ \uparrow \] to Advanced Set and press \[ \text{SELECT} \], scroll \[ \uparrow \] to Baby call and press \[ \text{SELECT} \].
2. Enter the Master PIN when prompted and press \[ \text{OK} \] to confirm.
3. Press \[ \text{SELECT} \] to enter Mode.
4. Scroll \[ \uparrow \] to On and press \[ \text{OK} \] to confirm.

When Mode is activated but the Baby Call number is not set yet, your handset will prompt you to enter a number.

5. Enter the Baby Call number and press \[ \text{OK} \] to confirm.
A confirmation message will be displayed on the screen.

To deactivate Baby Call mode
1. Long press \[ \text{MENU} \] (when Baby Call mode has been activated before).
2. Scroll \[ \uparrow \] to Off and press \[ \text{SELECT} \] to confirm.

To change Baby Call number
1. Press \[ \text{MENU} \] scroll \[ \uparrow \] to Advanced Set and press \[ \text{SELECT} \], scroll \[ \uparrow \] to Baby call and press \[ \text{SELECT} \].
2. Enter the Master PIN when prompted and press \[ \text{OK} \] to confirm.
3. Scroll \[ \uparrow \] to Number and press \[ \text{SELECT} \].
4. The last stored Baby Call number is displayed (if any).
5. Enter the new Baby Call number and press \[ \text{OK} \] to confirm.
A long confirmation beep is emitted and the screen returns to previous menu.
Advanced Settings

Registration

The procedures described below are the procedures that you will find in your SE635 handset. The procedures may vary according to the handset you want to register. In this case, please refer to the manufacturer of the additional handset.

Additional handsets must be registered to the base unit before you can use them. Up to 5 handsets can be registered to one base station.

To register an additional handset

1. On the base station, press and hold \( \text{[\#]} \) for 3 seconds in stand-by mode. After that, the registration procedure has to be done within 1 minute.

2. At the same time, on the handset, press \( \text{[\#]} \text{MENU} \), scroll \( \text{[\#]} \) to Advanced Set and press \( \text{[\#]} \text{SELECT} \), scroll \( \text{[\#]} \) to Registration and press \( \text{[\#]} \text{SELECT} \).

3. Enter the Master PIN when prompted and press \( \text{[\#]} \text{OK} \) to start registration.

4. Press \( \text{[\#]} \) to select the Base to be registered to and press \( \text{[\#]} \text{OK} \) to confirm.

A long confirmation tone is emitted to indicate successful registration and the screen returns to stand-by mode.

The Master PIN is required before you can register or unregister handsets. The default PIN is 0000.

Within 1 minute, the base station is able to accept registration from a handset. If no key is pressed within 10 seconds, the registration procedure will be aborted.

Select Base

One SE635 handset can register up to 4 different SE635 Base stations. By default, the handset will register to BASE 1. If you select Any Base, the handset will register to the nearest base station.

To manually select a base station

1. Press \( \text{[\#]} \text{MENU} \), scroll \( \text{[\#]} \) to Advanced Set press \( \text{[\#]} \text{SELECT} \), scroll \( \text{[\#]} \) to Select Base and press \( \text{[\#]} \text{SELECT} \).

2. Scroll \( \text{[\#]} \) to the desired base station and press \( \text{[\#]} \text{OK} \) to confirm.

3. The handset will start searching for the base station. If the selected base is found, a long confirmation tone is emitted.
Advanced Settings

Unregistration

To unregister a handset
1. Press `MENU`, scroll `to Advanced Set and press `SELECT`, scroll `to Unregistration and press `SELECT`.
2. Enter the Master PIN when prompted and press `OK` to confirm.
3. Press on the handset keypad the handset number corresponding to the handset that you wish to unregister.

If there are no key presses within 15 seconds, the unregistration procedure will be aborted and the handset returns to stand-by mode.
A long confirmation beep is emitted to indicate successful unregistration and the screen shows Unregistered.

Change Master PIN

The Master PIN is used for setting call barring/baby call number and for registration/unregistration of handsets. The default Master PIN number is 0000. The length of the PIN is 4 digits. This PIN is also used to protect the settings of your handset. Your handset will prompt you whenever the PIN is required.

To change Master PIN
1. Press `MENU`, scroll `to Advanced Set and press `SELECT`, scroll `to Change PIN and press `SELECT`.
2. Enter the current Master PIN when prompted and press `OK` to confirm. The PIN entered will be shown as asterisks (*) on the screen.

If an incorrect PIN is entered, Incorrect Pin will be displayed and the screen returns to stand-by mode.
If your PIN number is the default 0000, step 2 is skipped.

3. Enter new PIN and press `OK`.
4. Enter new PIN again and press `OK` to confirm PIN change.
   A confirmation tone is emitted, the message New PIN Stored appears and the screen returns to previous menu.

If the Master PIN is modified, you will be required to enter the Master PIN before you can modify Call Barring and Baby Call settings.
Advanced Settings

Reset

Reset to default settings

1. Press \( \text{MENU} \), scroll \( \uparrow \) to Advanced Set and press \( \text{SELECT} \), scroll \( \uparrow \) to Reset and press \( \text{SELECT} \).
2. Enter the Master PIN when prompted and press \( \text{OK} \).

   \[ \text{If your PIN number is the default 0000, step 2 is skipped.} \]

3. Scroll \( \uparrow \) to Yes and press \( \text{SELECT} \).
   A confirmation beep is emitted, and the unit is reset to its default settings (please see "Default settings" on page 17).

\[ \text{The WELCOME mode will appear again after master reset.} \]

Auto Prefix

The maximum length of an auto prefix number is 5 digits. Once the number is set, it will be automatically inserted at the beginning of each number that will be dialed.

To set auto prefix number

1. Press \( \text{MENU} \), scroll \( \uparrow \) to Advanced Set and press \( \text{SELECT} \), scroll \( \uparrow \) to Auto prefix and press \( \text{SELECT} \).
2. The last stored auto prefix number is displayed (if any).
3. Enter the number and press \( \text{SELECT} \) to confirm.
   A confirmation beep is emitted and the screen returns to previous menu.

Country Setting

The availability of this menu is dependent on your country.
You can select another country different from the one chosen during Welcome mode.

1. Press \( \text{MENU} \), scroll \( \uparrow \) to Advanced Set and press \( \text{SELECT} \), scroll \( \uparrow \) to Country and press \( \text{SELECT} \).
2. Enter the Master PIN when prompted and press \( \text{OK} \) to confirm.

   \[ \text{You need to enter the Master PIN even if your PIN is 0000 (default PIN).} \]
Advanced Settings

3. Scroll ▼ to the country of your choice and press ▼ SELECT to confirm.

Once the country is selected, the default line settings for the selected country will be applied to the phone automatically (e.g. Recall time, Dial mode, Language, etc).

Conference Mode

When Conference mode is activated, you can initiate a three-party conference call with a second handset registered to your base station automatically if the second handset takes the line when there is already an external call in progress.

The default setting for this mode is Off.

To activate/deactivate conference mode

1. Press ▼ MENU, scroll ▼ to Advanced Set and press ▼ SELECT, scroll ▼ to Conference and press ▼ SELECT.

2. Scroll ▼ to On or Off and press ▼ SELECT to confirm.

A confirmation beep is emitted and the screen returns to previous menu.
This menu provides a convenient means for you to access, activate or deactivate some network services that are country/subscription dependent. Contact your network provider for more information about these services.

The default numbers and values that are preset in your SE635 should be the best suited for your country network and therefore you should not need to change them.

**Call Forward**

There are 3 call forwarding options available: Unconditional Call Forwarding, When Busy and When Unanswered.

**Set up Call Forward number**

2. Scroll to the type of call forwarding option you wish to set (Call Forward / Call Fwd Busy / Call Fwd UnAns) and press `SELECT`.
3. Scroll to Settings and press `SELECT` to enter the number for forwarding.
4. Press `OK` to confirm.

**Activate Call Forward**

2. Scroll to the type of call forwarding option you wish to set (Call Forward / Call Fwd Busy / Call Fwd UnAns) and press `SELECT`.
3. Press `SELECT` to Activate.
4. The number string for that selected service will be dialled.
5. When the number has been dialled, press `END` to return to stand-by mode.

**Deactivate Call Forward**

Network Services

2. Scroll to the type of call forwarding option you wish to set (Call Forward / Call Fwd Busy / Call Fwd UnAns) and press SELECT.
3. Scroll to Deactivate and press SELECT to confirm.
4. The number string for that selected service will be dialled.
5. When the number has been dialled, press R to return to stand-by mode.

Voice Mail

This feature allows the caller to leave a voice message when you are unable, or do not wish to take a call yourself. The availability of this feature is dependent on your country and your subscription with your network provider. Charges often apply for you to retrieve messages, as these are stored by the network rather than on the handset itself. Contact your network provider for more information about this feature.

Set up Voice Mail number
1. Press MENU, scroll to Net. Service and press SELECT, scroll to Voice Mail and press SELECT.
2. Scroll to Voice Mail 1 or Voice Mail 2 and press SELECT.
3. Scroll to Settings and press SELECT.
4. Modify the voice mail number and press OK.

Activate Voice Mail
1. Press MENU, scroll to Net. Service and press SELECT, scroll to Voice Mail and press SELECT.
2. Scroll to Voice Mail 1 or Voice Mail 2 and press SELECT.
3. Press SELECT to Activate.
4. The number string for that selected service will be dialled.
5. When the number has been dialled, press R to return to stand-by mode.

Call Back

Setting
1. Press MENU, scroll to Net. Service and press SELECT, scroll to Call Back and press SELECT.
2. Scroll to Settings and press SELECT.
3. Enter the required number for call back and press OK.

Activate Call Back
1. Press MENU, scroll to Net. Service and press SELECT, scroll to Call Back and press SELECT.
2. Press SELECT to Activate.
3. The number string for that selected service will be dialled.
When the number has been dialled, press \(\text{e}\) to return to stand-by mode.

### Cancel Call Back

#### Setting
1. Press \(\text{\textasciitilde}\text{\textasciitilde}\) \text{MENU}, scroll \(\text{\textasciitilde}\) to Net. Service and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT, scroll \(\text{\textasciitilde}\) to Cancel Call Bk and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
2. Scroll \(\text{\textasciitilde}\) to Settings and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
3. Enter the required number for cancelling of call back and press \(\text{\textasciitilde}\) OK.

#### Activate Cancel Call Back
1. Press \(\text{\textasciitilde}\text{\textasciitilde}\) \text{MENU}, scroll \(\text{\textasciitilde}\) to Net. Service and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT, scroll \(\text{\textasciitilde}\) to Cancel Call Bk and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
2. Press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT to Activate.
3. The number string for that selected service will be dialled.
4. When the number has been dialled, press \(\text{\textasciitilde}\) \text{\textasciitilde}\) to return to stand-by mode.

### Withhold ID

#### Setting
1. Press \(\text{\textasciitilde}\text{\textasciitilde}\) \text{MENU}, scroll \(\text{\textasciitilde}\) to Net. Service and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT, scroll \(\text{\textasciitilde}\) to Withhold ID and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
2. Scroll \(\text{\textasciitilde}\) to Settings and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
3. Enter the required number for withholding ID and press \(\text{\textasciitilde}\) OK.

#### Activate Withhold ID
1. Press \(\text{\textasciitilde}\text{\textasciitilde}\) \text{MENU}, scroll \(\text{\textasciitilde}\) to Net. Service and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT, scroll \(\text{\textasciitilde}\) to Withhold ID and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
2. Press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT to Activate.
3. The number string for that selected service will be dialled.
4. When the number has been dialled, press \(\text{\textasciitilde}\) \text{\textasciitilde}\) to return to stand-by mode.

#### Deactivate Withhold ID
1. Press \(\text{\textasciitilde}\text{\textasciitilde}\) \text{MENU}, scroll \(\text{\textasciitilde}\) to Net. Service and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT, scroll \(\text{\textasciitilde}\) to Withhold ID and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT.
2. Scroll \(\text{\textasciitilde}\) to Deactivate and press \(\text{\textasciitilde}\) \text{\textasciitilde}\) SELECT to confirm.
3. The number string for that selected service will be dialled.
4. When the number has been dialled, press \(\text{\textasciitilde}\) \text{\textasciitilde}\) to return to stand-by mode.
Games

Memory
The objective of this game is to find and match different pairs of graphics in the shortest possible time using your memory. To win, you have to complete matching all 8 pairs of graphics in a 4x4 matrix.

To start the game
1. Press MENU, scroll to Games and press SELECT; press SELECT to enter Memory game.
2. An instruction screen is displayed.

   Press 8 / 4 / 6 / 8 keys to move up / down / left / right respectively.
   Press 9 to select.

3. Press SELECT or press 8 to start the game.
4. To exit from the game, press 4.

Tetris
You can rotate each shaped block as they fall such that they fit neatly into horizontal blocks. The more blocks you can gather within the same level, the more you will score.

To start the game
1. Press MENU, scroll to Games and press SELECT, scroll to Tetris and press SELECT.
2. An instruction screen is displayed.

   Press 8 / 4 / 6 / 8 keys to rotate / move left / move right / move down respectively.

3. Press SELECT to start the game.
4. To exit from the game, press 4.
EN

Telephone Answering Machine (TAM)

Your SE635 features an answering machine that records unanswered calls when it is activated. The answering machine can store up to 99 messages within the maximum recording time of 30 minutes.

Your SE635 base station answering machine control keys

- Answer Machine
  - Play
  - Delete All
  - Record Memo
  - Answ. Mode
  - Ans. On/Off
  - Settings
  - Voice Lang.

Answer Machine

Page handset.
Long press to start registration procedure.

On/Off key
Long press to turn the answering machine On/Off.

Volume keys
Increase speaker volume during message playback.
Reduce speaker volume during message playback.

Next message key
Delete key
Previous message/Replay message key
SIM card tray
Play/Stop key
Paging key
Telephone Answering Machine (TAM)

Delete current message during message playback.
Long press to delete all messages when TAM is in standby mode (unread messages will not be deleted).

Play phone messages (the first recorded will be played first).
Stop message playback.

Go to previous message if pressed within 1 second of current message playback.
Replay current message if pressed after 1 second of current message playback.
Skip to the next message during message playback.

LED Message counter
No display: Indicates that the answering machine is switched off.
Blinking: Indicates number of new messages.
Steady: Indicates number of old messages.
2 bars flashing: Indicates that there is no more memory left.
Indicates the volume level (L0 - L9) when \( \text{v} \) is pressed.
Indicates the current message number during playback.

Play

Playback of new messages via handset
1. Press \( \text{m} \) MENU, scroll \( \text{a} \) to Answer Machine and press \( \text{m} \) SELECT, press \( \text{m} \) SELECT to Play.
2. The new messages will be played via the loudspeaker. During playback, you can:

<table>
<thead>
<tr>
<th>Function</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjust volume</td>
<td>Press ( \text{v} ) key.</td>
</tr>
<tr>
<td>Stop playback</td>
<td>Press ( \text{v} ) or ( \text{v} ) to stop and return to Play menu.</td>
</tr>
<tr>
<td>Repeat</td>
<td>Press ( \text{m} ) SELECT, scroll ( \text{a} ) to select Repeat and press ( \text{m} ) SELECT.</td>
</tr>
<tr>
<td>Next message</td>
<td>Press ( \text{m} ) SELECT, scroll ( \text{a} ) to select Next Message and press ( \text{m} ) SELECT.</td>
</tr>
<tr>
<td>Previous message</td>
<td>Press ( \text{m} ) SELECT, scroll ( \text{a} ) to select Prev. Message and press ( \text{m} ) SELECT.</td>
</tr>
<tr>
<td>Delete message</td>
<td>Press ( \text{m} ) SELECT, scroll ( \text{a} ) to select Delete and press ( \text{m} ) SELECT.</td>
</tr>
<tr>
<td>Switch the playback to earpiece</td>
<td>Press ( \text{v} ) key.</td>
</tr>
</tbody>
</table>
EN Telephone Answering Machine (TAM)

**TIp** You can also playback messages by pressing `5` key in stand-by mode, scroll `D` to Answer Machine and press `3` SELECT, press `3` SELECT again to Play.

Playback of old messages via handset

Old messages can only be played if there are no new messages. The first recorded message will be played first and the next message will be played automatically until there are no more messages.

1. Press `6` MENU, scroll `D` to Answer Machine and press `3` SELECT, press `3` SELECT to enter Play.
2. Press `3` OK, the first recorded message will start to play until the last recorded message. During message playback, you can press `6` MENU to select the available options. (Please refer to the options available under "Playback of new messages via handset" on page 53.)

Delete All

1. Press `6` MENU, scroll `D` to Answer Machine and press `3` SELECT, scroll `D` to Delete All and press `3` SELECT.
2. Press `3` SELECT again to confirm deletion of all your messages.

Unread messages will not be deleted.

Memo recording

You can record a reminder message for yourself or for anyone else who uses your answering machine. The answering machine treats a memo recording the same way it treats any incoming message, and the new message indicator will flash accordingly.

1. Press `6` MENU, scroll `D` to Answer Machine and press `3` SELECT, scroll `D` to Record Memo and press `3` SELECT.
2. Press `3` START to start recording the memo.
3. Press `3` STOP to end the recording.

Answering machine mode

1. Press `6` MENU, scroll `D` to Answer Machine and press `3` SELECT, scroll `D` to Answer Mode and press `3` SELECT.
2. There are 2 answering modes available: Answer Only or Answ. & Record. The current selected mode is highlighted.
Telephone Answering Machine (TAM)

3. To change the answering mode, scroll to your selection and press SELECT.

   If you select Answer Only mode, the answering machine will only pick up an incoming call after a certain number of rings but will not record any message. Your correspondent will be prompted to call back later.

Set Outgoing Messages (OGM)
1. Once the answering mode is set, you can choose to set your outgoing message as Predefined or Personalised.
2. The current selected mode is highlighted.
3. To change it, scroll to your selection and press SELECT.

Predefined Outgoing Messages
1. If you set your OGM as Predefined, you can press SELECT to play the OGM.
2. The predefined OGM will be played and the screen will return to previous menu once it has finished playing.

Personalised Outgoing Messages
1. If you set your OGM as Personalised, the following options are available:
   
<table>
<thead>
<tr>
<th>Play message</th>
<th>Playback existing outgoing message (if any).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record message</td>
<td>Record your outgoing message.</td>
</tr>
</tbody>
</table>

2. To play the existing OGM, scroll to Play message and press SELECT.
3. The existing OGM will be played and the screen will return to previous menu once it has finished playing.

   If there is no existing OGM, the screen will display Empty and return to previous menu.

4. To record your outgoing message, scroll to Record message and press SELECT.

   The maximum length of an outgoing message is 40 seconds.

5. Press START to start recording and press STOP to end the recording.
   The recorded message will be played and the screen will return to the previous menu once it has finished playing.

   When you record an outgoing message, the previous one is overwritten automatically.
EN

Telephone Answering Machine (TAM)

Answer On/Off

Turn answering machine On/Off
1. Press \( \text{MENU} \), scroll to Answer Machine and press \( \text{SELECT} \), scroll to Ans. On/Off and press \( \text{SELECT} \).
2. Scroll to On or Off and press \( \text{SELECT} \) to confirm.

Answering Machine settings

1. Press \( \text{MENU} \), scroll to Answer Machine and press \( \text{SELECT} \), scroll to Settings and press \( \text{SELECT} \).

Ring delay

This is the number of rings before the answering machine answers and starts playing your greeting. You can set the answering machine to start playing your greeting after 3 - 8 rings or Toll Saver. The default ring delay is 4.
1. Press \( \text{MENU} \), scroll to Answer Machine and press \( \text{SELECT} \), scroll to Settings and press \( \text{SELECT} \) to enter Ring delay.
2. Scroll to your desired ring delay setting (3 - 8 rings or Toll Saver) and press \( \text{SELECT} \) to confirm.

Remote control access

This feature lets you check your messages, or otherwise operate your answering machine, by calling the answering machine and entering a remote access code (which is the same as your Master PIN code) on a tone dialing phone.

Remote control access is only possible if the Master PIN code has been changed (see page 45) and is NOT the default (0000).

Activate/Deactivate remote access
1. Press \( \text{MENU} \), scroll to Answer Machine and press \( \text{SELECT} \), scroll to Settings and press \( \text{SELECT} \) to Remote access and press \( \text{SELECT} \).
2. The current selected option is highlighted.
Telephone Answering Machine (TAM)

3. Scroll to Activated or Deactivated and press SELECT to confirm.

Remote access code is to prevent unauthorised access of the answering machine from external callers. The remote access code is the same as the Master PIN of the phone.

Controlling the answering machine from an external call

1. From your external phone, dial home. The answering machine answers and starts playing your greeting message.

2. Within 4 seconds, enter the remote access code (same as your Master PIN code) and press # key. If the code is not correct, the answer machine will drop the line immediately.

3. If the access code is correct, a long beep tone can be heard. If there are new messages, all the new messages will be played immediately and then stop when there are no more new messages. If there are no new messages, the answering machine will not play any messages.

The following table indicates how to access the below features during remote access procedure:

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. Replay current message or go to previous message.
2. Play old messages or stop them.
3. Go to next message.
4. Delete current message.
5. Turn the answering machine on/off.

Call screening

Handset call screening

If Handset Call screening is set to On, when there is an incoming message, you can press MENU to listen to the message. If you decide to pick up the call, press . Once the call has been picked up, the recording will stop automatically. If you press , the call will be cut off and the recording will be ignored.

Set Handset Call Screening

1. Press MENU, scroll to Answer Machine and press SELECT, scroll to Settings and press SELECT, scroll to HS Screening and press SELECT.
2. The last selected option is highlighted.
3. Scroll to On or Off and press SELECT to confirm.

If you have multiple handsets, only 1 handset can enable handset call screening for each call.

Base Call Screening

If Base call screening is set to On, you can hear the incoming message via the loudspeaker of the base station. If you press , the call will be cut off and the recording will be ignored.
Telephone Answering Machine (TAM)

Set Base Call Screening

1. Press \( \text{MENU} \), scroll \( \uparrow \) to Answer Machine and press \( \text{SELECT} \), scroll \( \uparrow \) to Settings and press \( \text{SELECT} \), scroll \( \uparrow \) to Base Screening and press \( \text{SELECT} \).
2. The last selected option is highlighted.
3. Scroll \( \uparrow \) to On or Off and press \( \text{SELECT} \) to confirm.

By default, the call screening on base unit is activated and call screening on handset is deactivated.

Voice Language

This menu allows you to change the language of the predefined OGM. The availability of this menu and the language options available are country dependent.

To set voice language

1. Press \( \text{MENU} \), scroll \( \uparrow \) to Answer Machine and press \( \text{SELECT} \), scroll \( \uparrow \) to Voice Lang. and press \( \text{SELECT} \).
2. The current selected language is highlighted.
3. Scroll \( \uparrow \) to your preferred language and press \( \text{SELECT} \) to confirm.

A confirmation beep is emitted and the screen returns to previous menu.
## Troubleshooting

### Troubleshooting of the phone

<table>
<thead>
<tr>
<th>Problem</th>
<th>Causes</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The &quot;(\text{\textbullet})&quot; icon is not blinking when the handset is placed on the base</td>
<td>• Bad battery contact&lt;br&gt; • Dirty contact&lt;br&gt; • Battery is full</td>
<td>• Move the handset slightly&lt;br&gt; • Clean the battery contact with a cloth moistened with alcohol&lt;br&gt; • No need to charge</td>
</tr>
<tr>

Information

Electric, Magnetic and Electromagnetic Fields ("EMF")

1. Philips Royal Electronics manufactures and sells many consumer-oriented products which usually, as with any electronic apparatus, have the ability to emit and receive electromagnetic signals.
2. One of Philips’ leading Business Principles is to take all necessary health and safety precautions for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.
3. Philips is committed to develop, produce and market products that cause no adverse health effects.
4. Philips confirms that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.
5. Philips plays an active role in the development of international EMF and safety standards, enabling Philips to anticipate further developments in standardisation for early integration in its products.

Conformity

The Declaration of conformity is available on www.p4c.philips.com.
Hereby, Philips Consumer Electronics, BLC P&ACC, declares that the SE635x is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Recycling and disposal

Disposal instructions for old products

The WEEE Directive (Waste Electrical and Electronic Equipment: 2002/96/EC) has been put in place to ensure that products are recycled using best available treatment, recovery and recycling techniques to ensure human health and give utmost protection to the environment.
Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.
Do not dispose of your old product in your general household waste bin. Inform yourself about the local separate collection system for electrical and electronic products marked by this symbol:

Use one of the following disposal options:
1. Dispose of the complete product (including its cables, plugs and accessories) in the designated WEEE collection facilities
2. If you purchase a replacement product, return your old product, in its entirety, to the retailer. He should accept it as required by the WEEE Directive.

Philips has marked the packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

- A financial contribution has been paid to the associated national recovery & recycling system.
- The labelled packaging material is recyclable.
