Road-legal LED

H7-LED

Up to 230% brighter light\*

Lumileds automotive LEDs

11972U6000X2

## Taking bright white light to the next level

## The perfect blend of performance and durability

Enjoy an unprecedented driving experience with Philips first road-approved LED headlight upgrade. With up to 230% brighter light\* and a daylight-like white beam, these LEDs illuminate everything clearly without dazzling oncoming drivers.

#### **Superior visibility**

- Up to 230% brighter light\*
- Experience improved visibility

## White-light experience

• 5800 Kelvin color temperature for crisp white light

#### Long lasting performance

- ${}^{\centerdot}$  Built to last up to 3,000 hours
- · Philips automotive lighting for the highest quality

### Road-legal LED

· Road legal LED upgrade lamps

### **Enhanced fit with compact design**

 ${}^{\textstyle \bullet}$  Compact all-in-one design for plug-and-play use

# Highlights

#### Safe and road legal LED light

At Philips automotive lighting, we were the first in the world, starting in Korea, to make upgrading from halogen to LED legal on public roads. Now we are bringing this expertise to German public roads with Philips Ultinon Pro6000, homologated by the country's Federal Motor Transport Authority (KBA) for selected vehicle models. Convert the low beam of your halogen headlights to our tested, safe and road-approved Philips Ultinon Pro6000 LED light for a breathtaking new look and an unrivalled driving experience. Further information at www.philips.de/LED-Strassenzulassung

#### Up to 230% brighter light\*

Driving in the dark is demanding, so you rely on your headlights. Upgrade them for that new-car LED look. Boost long-range visibility for night driving and short-range brightness for spotting other road users and hazards. With SafeBeam technology, Philips Ultinon Pro6000 LED car headlight bulbs increase your visibility by up to 230%\*. Once you experience this daylight—like effect, you'll always prefer LED. The more you see, the better you perform, and the faster you react, the safer you are. So defeat darkness, choose Philips and start driving at night with greater confidence and control.

#### **Experience improved visibility**

Beam pattern is just as important as brightness: a uniform, accurate beam pattern lets you see and be seen more clearly. Thanks to the perfect positioning of the LED chips on the Philips Ultinon Pro6000 bulbs, drivers have light exactly where they need it on the road without dazzling oncoming vehicles.

#### 5800 K for crisp white light

With a high color temperature of up to 5800 Kelvin, the Philips Ultinon Pro6000 produces a bright white light that's close to daylight. The

clearer vision this provides makes it easier to spot obstacles and take the perfect driving line. The optimal color temperature avoids tiring or straining the eyes, giving you more comfortable and safer night-time driving.

#### 3-year warranty

You want bright, stylish headlights but you don't want to keep replacing failed lamps. LED lights generate heat that must be managed. Philips AirBoost technology is a smart cooling system that diverts heat away from the light's critical components. Greater heat resistance enables Philips Ultinon LED to last longer than comparable products currently on the market. Philips Ultinon Pro6000 provides up to 3,000 hours' use. Please contact our customer service center to register for the extended warranty.

#### Compact all-in-one design

Philips Ultinon Pro6000 LED's brand-new design takes up minimal space in the headlamp unit. Its one-piece design and integrated electronics make fitting easier, too. This bulb is compatible with a wide range of car models and can be easily installed by DIYers or specialist mechanics.

## **Highest quality lighting**

Technologically advanced Philips lighting is renowned in the automotive industry and has been for over 100 years. Philips Automotive Grade Quality products are designed and developed following strict quality-control processes, leading to consistently high production standards. Major car manufacturers choose Philips lamps because when you buy Philips, you buy quality. You get powerful, bright light and precise beam performance. You get high-end style. And you get an advanced LED lighting system for a safer, smoother, more enjoyable drive.
